Dave Haddox has joined Purdue as a Medical Director, International Analgesics. I hope to introduce you to him next week.

While the details of his job description remain in development, we are considering roles for him in regards to:

- a) pain policy and risk management, primarily in the US
- b) international analgesic issues (eg, primary medical responsibility for the planned assessment of the practice of postoperative pain management in Japan - interacting with Japanese and outside medical advisors and us)
- c) medical consultant to the EDLA team

REGARDS
